MOULDERS

MODEL: L4A / 1P, L4B / 2P, L4C / 1P / SxS, L4D / 2P / SxS

G. CINELLI - ESPERIA CORPORATION® offers four variants of it's Moulder. The L4A/1P and the L4C/1P/SxS are the compact versions of our Moulder. We also manufacture long versions which are extra gentle formers that have two consecutive forming plates, with configuration options of two plates (fore and aft) on the L4B/2P, or four plates L4D/2P/SxS.

The long Moulders offer extra gentle forming capabilities that help maintain the integrity of the yeast and overall dough product. If you happen to be working within limited space, the compact version is for you.

All Moulders contain a four cylinder dough sheeting mechanism for delicate and progressive sheeting, furthermore, the cylinders are adjustable from 1/16" to 1" width and are of varied speed which prevents over-processing the dough product.

For sanitary reasons, the cylinders, moulding section as well as the pressure plates are easily accessible. All components and materials are top quality to ensure durability and dependability.

As with all products manufactured at G. CINELLI - ESPERIA CORPORATION®, the Moulders are built heavy duty to provide years of use, and to cope with harsh working environments.
