

TABLE TOP SHEETERS

CG/LAM SERIES

The CG/LAM Table Top line of Reversible Sheeters were specifically designed with the particular consideration for use within hotels, restaurants and small bread and pastry bakeries.

Dimensions of the machine are quite compact, more so when the machine is in its storage position. Once finished using the machine, the conveyor tables can be raised up into a resting position, thereby occupying less space within the work area. This position also facilitates effective cleaning of the unit.

High quality materials such as Stainless Steel, Aluminum and treated components ensure a sanitary unit while maintaining consistency, durability and longevity.

The absence of uncovered and unprotected electrical components, motors, and chords, the detailed conformity of the exterior panels, the simplicity of the removable and replaceable dough scrapers without use of tools and minimal time to do so, make this unit particularly simple and expedient to clean.

Ergonomically designed handles facilitate ease of dough thickness selection with a high degree of accuracy and confidence. All of these features coupled with the general ease of use make this machine unparalleled.
